**Re: Fairview Park Entryway Concept Plan**

Dear Ms. Woodward,

I am writing in response to the above referenced letter written by Dr. Carol Roland-Nawi on Sep. 24, 2013, in which she refers any questions or comments over to you. Her comments and recommendation are appreciated. SRS, Inc. has been contracted to perform the archaeological investigations for this project. SRS will be performing a Phase 1 investigation as per the California State Historic Preservation Office guidelines under CEQA and Archaeological Resources, which will include the following procedures:

- Record Search at the Information Center
- Archival Research
- Sacred Lands Search with NAHC and local Native Groups
- Archaeological Survey

The work completed to date includes:

- Contacted the NAHC and obtained the Native American Contacts
- Sent letters to all the Native American Contacts provided by the NAHC. In some cases, I have received confirmations from the Native American contacts that they received our request.
- Requested records from the South Central Costal Information Center, the official cultural resource records repository for Orange Count.
- Performed a records search for Historical and Paleontological resources and materials of the area.
- Visited the park to re-familiarize ourselves with the reported boundaries of the archaeological site CA-ORA-58.
- Attended the City Council meeting Oct. 15, 2013.

SRS is still waiting for the results of the records search. Once we receive these records, all records and data will be evaluated and a Research Design will be created, which will include the strategy for the surface survey. Three archaeologists will conduct the field reconnaissance of the upper mesa, including the site of the proposed turnarounds and play area. The field reconnaissance will be monitored by Native American monitors of the Gabrielino and Juaneño

Tribes. Once we do our reconnaissance survey, SRS will produce a report with recommendations for site preservation.

I hope this letter addresses your concerns as per the archaeological evidence. Should it not, please feel free to contact me anytime by phone or email.

Respectfully,

Destiny Colocho  
Project Manager
