COMPLIANCE REPORTING

The City holds two Lehman Brothers Medium-Term Corporate Notes in its investment portfolio. The total amount invested in these two securities stated at cost is \$5,049,700. Lehman Brothers filed for bankruptcy protection status on September 15, 2008 and the debt rating fell to B3- on that date. These securities had been rated A2 up until the bankruptcy filing. The market value loss of \$4,107,075 for the securities was recorded on the City's general ledger in September 2008, and is updated annually. The current estimates for recoveries through the bankruptcy proceedings are unknown.

In April 2011, the City joined the Ad Hoc Group of Lehman Brothers Creditors to help maximize the recovery through bankruptcy proceedings, and to protect the City's interest in the Lehman Brother's bankruptcy. The Ad Hoc Group filed a "Creditor's Plan" with the U.S. Bankruptcy Court in Manhattan which would provide a better recovery to creditors of the original Lehman parent company while offering a smaller payout to some creditors of Lehman subsidiaries. On December 6, 2011, the Bankruptcy Court entered an order confirming the Debtors' Chapter 11 Plan. The initial distribution date was April 17, 2012, and the City received \$301,889.87. After the initial plan distribution, the Debtors will make distributions of cash available in accordance with the plan semi-annually on March 30 and September 30 of each year.

The investment portfolio is in compliance with the City's adopted investment policy and applicable state laws in all other respects during, and as of, the end of the reporting period.

City of Costa Mesa General Fund Cash Flow Projection

City Council has expressed a desire to determine the monthly cash flow for the General Fund in an effort to project the future monthly cash balance. Given the City's historical healthy cash position, it had not been necessary to project monthly cash balance for the General Fund. Therefore, a cash flow model was developed to better analyze the normal monthly activity and the changing trends in both revenue and expenditures.

The General Fund revenues and expenditures fluctuate on a monthly basis, affecting cash. In developing the cash flow model, 5 year historical data was used for: individual revenue accounts and monthly cash activity. The combination of the two appears to be the best way to accurately project the ending monthly cash balance. However, there remains the possibility of aberrations when actual cash activity is posted and reconciled.

The following is historical and projected General Fund ending cash balances and monthly cash flow activity:
